

IISOMI Action Items

NOTE: Administration of IISOMI action items

- New actions are added to the minutes of the current meeting and dated using the "task list" control
- Do not copy actions from previous minutes, just add bullet version to reference the source minutes
- In every IISOMI meeting, check the action item list and check for tasks that have passed their due date
 - If the due date is past, determine if the issue is still active
 - If the task is active, mark the over-due task as completed, and create a new task with a new due date in the minutes
 - If the task is not active, (i.e. not going to be progressed at this time), simply close the task and make a note in the minutes that the task was closed.

Description	Assignee	Label (s)	Due date	Task appears on
<input type="checkbox"/> Andrea Mazzini Scott Mansfield 24 Jun 2022 Review the proposed Gendoc script from Scott on retrieving the «Cond» properties of an association. <ul style="list-style-type: none"> • Andrea considered yang translation <ul style="list-style-type: none"> • «Cond» on attributes is translated into if-feature statement but with limits (e.g., OR/AND is not supported) • «Cond» on associations usage is limited to abstractions and conditional augmentations. This is not translated into Yang. • Reference by value translation loses the condition statement in the yang translation. This will have to be done by hand. <ul style="list-style-type: none"> • Many of the property conditions could be on groups of properties that are in packages and hence referenced by value and hence on member end and hence lost. • Note that the «Cond» works on containers and leaves. • Noted that «OpenModelClass» has a condition. • Firstly, explore all condition statement that are in other stereotypes (not just «Cond»). Fix if statements as necessary. Consider any place where stereotype information is to be printed (this requires this code). Consider code for (perhaps using several separate runs): <ul style="list-style-type: none"> • Loop over all stereotypes and print all attributes that are NOT empty/default • Selecting specific stereotype list • Printing all 	Andrea Mazzini	meeting -notesii somi-meeting -notes	24 Jun 2022	2022-05-20 IISOMI Meeting Minutes
