ONF Spotlight Series

ONF launched a new virtual series for 2020-2021 that seeks to deliver valuable industry insights about the fast-growing open source movement for building next generation mobile and broadband infrastructures. The **ONF Spotlight Series** incorporates a combination of virtual live and on-demand content that is accessible to a broad audience across the globe.

The format for each ONF Spotlight includes a number of virtual Live Keynotes along with several pre-recorded plenary and technical sessions. The Live Keynotes are free and open to the public, while the pre-recorded content will be made available to ONF members for early access before being released (and promoted) publicly.

ONF is pleased to announce the **2021 Private 5G for Industry 4.0 Spotlight**. This event is focused on exploring enterprise digital transformation with 5G and edge cloud, and registration is now open, and the **CFP closes August 6, 2021**.

The ONF Spotlight Series schedule for 2020 included:

- **July** – Broadband
  - CFP Close – May 1, 2020 | Release Date - July 7 & 8, 2020 - View on-demand content
- **September** – 5G Transformation with Open Source
  - CFP Close – July 1, 2020 | Release Date - September 8 & 9, 2020 - View on-demand content
- **December** – 5G Connected Edge Cloud for Industry 4.0 Transformation
  - CFP Close – August 1, 2020 | Release Date - December 8 & 10, 2020 - View on-demand content

**How can you get involved?** There are several ways:

- For each Spotlight, a [Call for Proposals (CFP)](#) will be opened to invite presentations for panels, breakouts, as well as demonstrations for each Spotlight area of focus. A committee of industry experts together with the ONF technical team will review submissions and select the presentations to be included with each Spotlight forum. [Sign up for our newsletter](#) to stay informed of when a new Spotlight is announced.
- Consider [sponsoring](#) one particular Spotlight or the entire Series.
- Spread the word by inviting colleagues, friends, and others in your network to attend the Live Keynotes or submit content to the CFPs.
- Share the final presentations once they become publicly available, so the wider community can learn and benefit from the great content.

To access the recorded content during the ONF member-only period, you will need to register with a valid member company email address.

We'd also like to extend a warm thank you to the **2020 ONF Spotlight Program Committee**, a team of industry experts who have dedicated significant time to reviewing submitted content and moderating stimulating discussions/Q&A following presentations for the ONF Spotlight Series:

- David Bainbridge, Ciena
- Andrea Campanella, ONF
- Carmelo Cascone, ONF
- Charles Chan, ONF
- Roy Chua, AvidThink
- Saurav Das, ONF
- Louis Donofrio, Comcast
- Alireza Ghaffarkhah, Google
- Amit Ghosh, Radisys
- Alessio Giorgetti, Sant’Anna
- Devjit Gopalpur, Google
- Mahir Gunyel, Netsia
- Mario Kind, Deutsche Telekom
- Jian Li, SK Telecom
- Khen Nursimulu, Ciena
- Brian O’Connor, ONF
- Larry Peterson, ONF
- Timon Sloane, ONF
- Bill Snow, ONF
- Craig Stevens, Dell EMC
- Oguz Sunay, ONF
- Thomas Vachuska, ONF
