

SEBA / VOLTHA Continuous Certification Program

Currently we are accepting the following types of equipment for certification for SEBA / VOLTHA in the Continuous Certification Program:

- Servers
- Switches
- OLTs/ONUs

You can view the current CC Dashboard [here](#).

Before submitting a product, we recommend that you take the following steps to ensure your product is tested and proven functional prior to being integrated in the CC Program:

Servers

- Recommendations and Preconfiguration for the server can be found [here](#)
- Software stack required for SEBA installation can be found [here](#)

Switches

- Before certifying the switch against SEBA, switch must be conform to [OF Based Tests](#)

OLTs/ONUs

- OLT should be installed with right ONL version. Documentation for installing the ONL version can be found [here](#).
